NEW YORK, N. Y.

IMPORTANT ANNOUNCEMENT REGARDING "The New Thorburn Lower Price Policy"

THIS 1926 CATALOG ISSUE INAUGURATES THE NEW LOWER PRICE BASIS ON THORBURN'S SEEDS MADE POSSIBLE BY THE MANY ECONOMIES EFFECTED IN ORGANIZATION DURING THE PAST TWO YEARS, THE PRINCIPAL ITEMS OF WHICH ARE AS FOLLOWS:

WE DELIVER FREE all Flower and Vegetable Seeds by the packet, ounce, $\frac{1}{4}$ lb. or pound anywhere in the United States by Parcel Post, Express or Freight at our option; also some other items as specifically mentioned in body of Catalog. All other articles are strictly net, transportation charges not included.

PRICES.—The prices quoted are net, and subject to change without notice, some items having a tendency to fluctuate in accordance with crop conditions, etc.

NAME, ADDRESS, ETC.—We beg our correspondents to give us on **each** order the **correct name and address**; also to indicate **very precisely** the means of carriage which they prefer, **mail, express or freight**, and the office or railroad station which best serves their locality. In case these directions are not followed out, we shall, of course, choose the most advantageous and convenient mode of shipment.

NON-WARRANTY.—J. M. Thorburn & Co. give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, bulbs or plants they send out, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

☐ Elimination of our retail stores.

☐ Consolidation of all our seed departments in modern equipped premises under one roof.

☐ Elimination of salesmen's salaries, commissions and many other overhead expenses

☐ Installation of packing machinery and other equipment, resulting in a considerable saving of labor charges.

PRECISELY the same high-grade quality and superior strains which have become synonymus with the name Thorburn.

PRECISELY the same prompt and efficient service, brought to an even higher standard during the past two years.

This lower price policy constitutes the biggest step forward in the seed industry in many years and we invite your comparison with any seed catalog in the country.

J. M. THORBURN & CO.

BEANS

Culture.—About the first of May, if the ground is perfectly warm, select a warm, dry sheltered spot, any good soil, preferably a moist, deep loam, not over-rich in nitrogen, dig and manure very slightly; make drills 2 inches deep and 18 inches to 2 feet apart; drop the Beans 3 inches apart in the drills and cover not more than 2 inches deep. Hoe well in dry weather to keep down the weeds. Sow every two weeks up to about August 1st, for a succession. Two pounds (1 quart), to 100 feet of drill; 1 to 1½ bushels (60 to 90 pounds), to the acre, in drills. For quick results, soak the seeds before planting. To avoid disease and pests, all rubbish and old plants should be burned, and the seed sown on clean ground.

*Betterave
Barbabetola*

BEET

*Remolacha
Rube*

Culture.—Sow as early in the spring as the ground can be worked (1 ounce to 50 feet of drill; 5 or 6 pounds to the acre), and every two weeks after for a succession up to the first week of July. Later plantings will produce greens. For general crop, sow about the middle of May. To hasten germination, soak the seed over night. The soil should be light, sandy loam, well enriched with stable manure and plowed and harrowed until very fine. For long Beets the soil should be rich and deep, well pulverized and not recently manured.

Packets 10c.

	Oz.	¼ lb.	Lb.
Crimson Globe. Globular shape; root clean and smooth; few leaves; flesh rich, deep crimson; tender and sweet.....	1520	.15	.35 1.25

Plain	4250	.10 .20 .55	

CABBAGE

*Col Repollo
Kopfkohl Kraut*

Culture.—Soil for Cabbage should be rich and heavy loam, with good drainage. On such a soil, with an abundance of stable or our Complete Manure, excellent crops are sure to be grown. For early spring, sow in the fall, not too early, for the plants are liable to bolt in the spring instead of heading. In a month the plants will be fit to transplant to cold-frames, where they are wintered, taking care in planting to set the young plants down to the first leaves. Transplant in spring as soon as the ground can be worked, setting the plants 2 feet apart one way and from 12 to 18 inches the other, according to the variety.

Packets 10c

	Oz.	¼ lb.	Lb.
Copenhagen Market. The finest large, round-headed, early Cabbage. Very solid; of fine quality; short-stemmed.....	2390	.45 1.50 4.50

--------------	----------	-----	-----

*Chou-Fleur
Cavolo-flore*

CAULIFLOWER

*Coliflor
Blumenkohl*

Culture.—The same as for cabbage, except that extra manure and plenty of water will pay upon Cauliflower. If the soil be dry, water frequently, and, if the plants have a heavy mulch of hay or straw, it will keep the soil moist, and they will not suffer from drought. Cauliflower can be grown for an early crop by starting the seed under glass late in February or very early in March. Prick out the seedlings once. Keep them stocky, but do not stunt. Harden off to set out when the soil is in best condition in April.

Thorburn's Extra-Early Dwarf Erfurt. The best and earliest for forcing; very dwarf and compact; with short stem and small leaves. The curd is very tender and exceedingly fine flavored. Should not be confounded with entirely different sorts advertised. 2250 .20 1.00 3.00 11.50

Thorburn's Gilt Edge. Large, heavy sort; maturing immediately after our Large Snowball. Best of all. 2270 .25 1.40 4.75 16.00

Thorburn's Large Early Snowball. A large strain of finest quality. 2290 .20 1.25 3.75 13.50

Curled, or Pepper Grass	4520 .10	.25	.90
True Water Cress.	Pkt. 10c. 4570	.45	1.35

Golden Self-Blanching, Thorburn's Gilt Edge.

CORN, SWEET or SUGAR

Mais

Maiz

Kukurydza

Culture.—Plant in hills 3 feet apart each way, and five or six kernels in a hill. The hills should be prepared before planting by digging in a shovelful of compost and a double handful of high-grade fertilizer. In spring plant 1 inch deep; later plantings 1½ to 2 inches deep. Thin out to three plants in the hill, or, if in rows, to 12 inches apart. Two pounds will plant 150 to 200 hills. Hoe often and draw soil up to stem; break off side shoots. Corn requires a warm, rich soil and a sunny exposure. Plant for succession every two weeks until middle of July. If sown thinly in drills, a greater yield from a given surface will be obtained.

Packets, 10c. ½-lb. Packets, 25c.

EXTRA - EARLY

Lb. 5 lbs. 15 lbs.

Thorburn's Nordheim Extra-Early. Earliest and finest of all. The stalks grow 6 to 7 feet high, each bearing three or four nearly perfect ears of excellent quality. 7 inches long, 5 inches circumference; 8 to 10 rows; of large kernels, white and very sweet.....	3700	.40	1.90	5.50

Onion, Yellow Danvers.

Cipollo
Oignon

ONION

Cebolla
Zwiebel

Culture.—Sow in rich, sandy soil, in drills 1 foot apart, at the rate of 4 to 5 pounds to the acre, or 1 ounce to 100 feet of drill. Thin to 3 to 4 inches, using the rake and hoe frequently to keep down the weeds. The finest Onions are produced by the new method of sowing the seed in hotbed in February and March and transplanting the seedlings to the open ground. Against the coming of the Onion Maggot scatter tobacco dust about the bases of plants. For thrips use kerosene emulsion. It is best to destroy all plants attacked.

Packets 10c.
